PRODUCT [OperateMaths \(live\)](#)

● Available for work

PROFILE

I take an idea, make it look right, and put it on the internet — with AI as my co-pilot. I design static portfolio websites, logos and thumbnails, then use AI tools like Claude and Lovable to turn those designs into working pages, deploying them on Cloudflare Pages with a connected domain.

I'm upfront about how I work: the design decisions are mine, and AI writes much of the code. I'm learning to code step by step, starting with CS50 — full-stack development is the goal, with Python and automation to follow.

SELECTED WORK

Two live projects, both designed by me and built with AI tools.

OperateMaths LIVE PRODUCT · 2026

A maths tool I created with Claude and Lovable. I shaped the idea and the interface, and AI wrote the code. It's live and free to try.

Claude · Lovable · UI design · AI-assisted

[Open OperateMaths →](#)

ethruce DESIGN CONCEPT · 2026

A design project: a static, animation-heavy landing page for a concept AI-automation brand. A frontend design exercise with no real service behind it, made to practise layout, motion and branding.

Frontend design · Branding · Motion design · AI-assisted

SKILLS

Design

- Frontend & UI design *strong*
- Logo design *strong*
- Thumbnail design *strong*
- Colour, type & layout *comfortable*

Shipping websites

- Static portfolio websites *strong*
- Cloudflare Pages *comfortable*
- Custom domains *comfortable*
- Git & GitHub *basics*

Building with AI

- Prompting Claude & Lovable *daily*
- Turning ideas into pages *daily*
- Refining AI output *strong*
- Reading AI-written code *learning*

Learning roadmap

- CS50 (foundations) *in progress*
- Full-stack development *goal*
- Python *up next*
- Automation *later*

EDUCATION

CS50: Introduction to Computer Science Online · Self-paced My first step in learning to code properly.	2026 — Present
Senior Secondary (Class XII) Sri Chaitanya Techno School · Jodhpur, Rajasthan Science stream with Mathematics & Biology.	2024
Secondary (Class X) Career Point World School · Jodhpur, Rajasthan Completed secondary school.	2022

WHAT I'M DOING NOW

- **Learning to code** — starting with CS50 and building projects as I go, to understand how code really works.
- **Next up: Python & automation** — once the fundamentals are solid, adding Python and building automations on top of full-stack skills.
- **Playing chess** — my main hobby by far — openings, tactics and long games.
- **Also** — football and lawn tennis when I want to get off the screen and move.
